

Business Card Cutter

Visiting cards is an important business for a digital printer. It is important that you offer the cards as quickly as possible without wastage and with high accuracy. Business card cutter is an Ideal way to create instant visiting cards. All you need to do is to feed the machine with 4 attributes viz. Lead margin, length of the card, gutter space - if any - and no. of ups on the sheet. Then feed the sheet and let the machine cut up to 6 A3+ sheets per minute (144 cards per minute). What more, you can store up to 49 programs and use them to have highest productivity in card cutting. With its ability to correct the registration error of digital prints, this machine is a boon for digital printers. Optional features viz. creasing and perforation makes the card cutter more versatile and allows you to cut, slit, score or perforating one pass. Most easy way for print shop to produce all kind of cards i.e. business card, ticket and greeting card or invitation cards. If you are doing more than 200 sheets of visiting cards per day the machine pays for itself to make it free and generate more business for you. Call for more information or visit our website, www.hitechindia.net.
